 OVERALL TEST CASE RESULTS 6

FHRCL0200 – Clock In/Out

This transaction captures the user, clock event type, such as starting work or going to lunch, and a date / time stamp. The result can be displayed in the PA61 transaction.

The following conditions apply to the RFgen implementation for the Clock in/Out transaction within the SAP environment.

Note: any of these parameters may be easily adjusted to meet the unique requirements of your company.

✓ Validations

Prompt	Method of Validation
User ID	M_PREMN view
Event	DD07V

✓ Edits

Condition	Special Circumstance

↔ Function Keys

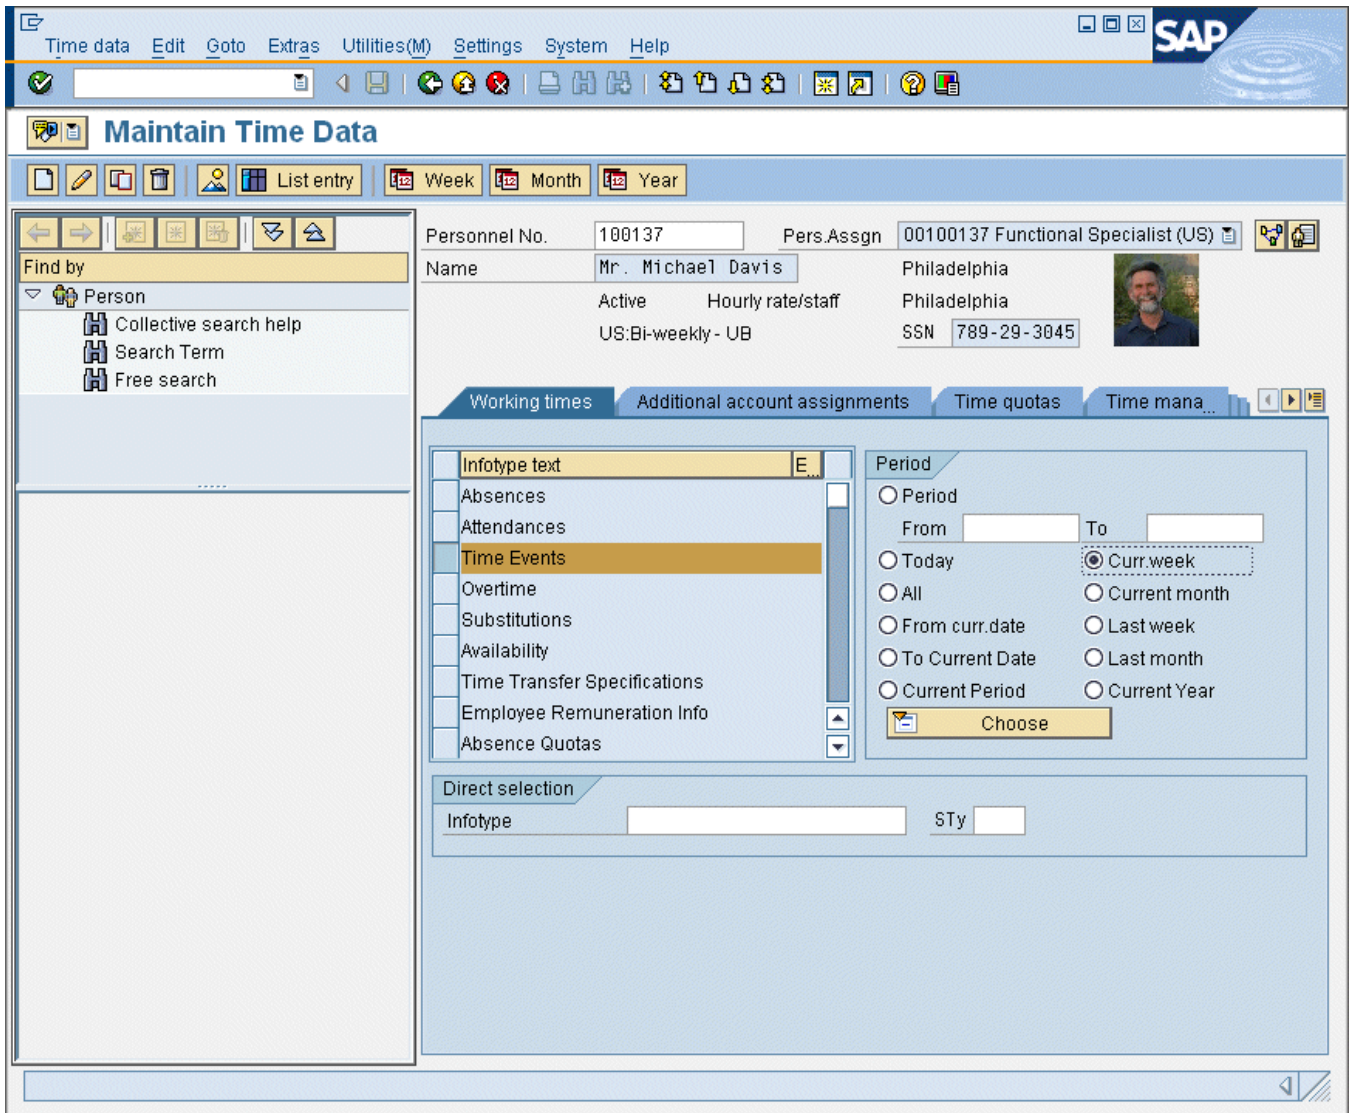

Key	Function
F3	Exit
F4	Search Data for Current Field
F8	Submit value for the Current Screen Display

Considerations

1. Do you want to make sure the sequence of clock events makes sense?

SAP Programs - Reference

SAP Clock Event: PA61

Click on List Entry for the next screen

Basic Test Script

1. Enter a user ID
2. Enter different clock events
3. Enter valid and invalid date and time values
4. Verify in PA61 all entries

Test Script Description: Clock Event
