

# DATAMAX IS NAMED AS ONE OF THE FRONTLINE "TOP 100" FOR THE SECOND YEAR IN A ROW!

October 2002

For the Second Year in a row DataMAX Software Group has earned designation as a **Top 100 Frontline Company** by the readers of Frontline Solutions magazine.

The honor goes to companies who earned the highest ratings from the readers for the value of their products and customer service.

Recognition as a Top 100 Frontline Company is available only to providers of specific products or services to front-line operations.

This recognition is significant since Frontline subscribers are typically leaders in applying new technology to extend the reach of their information systems. Frontline created the Top 100 Frontline Company program last year to identify and recognize those vendors who are taking the

lead in helping their readers achieve their visions.

The complete list of Top 100 Companies, including the overall Top 10 and the top finishers in each product category, will be revealed in the November issue of Frontline Solutions.

The DataMAX Software Group, Inc. continues to bring its expertise to the RFDC industry through its development of the most innovative software products and services in the

marketplace today!

If your company demands the BEST rapid application generator for data collection, contact your DataMAX Sales Representative at (916) 939-4065 or visit us online at [www.rfgen.com](http://www.rfgen.com).
